

CY-KICK® CS CONTROLLED RELEASE CYFLUTHRIN

High-performance microencapsulation technology for the most demanding pest control situations.

Cy-Kick CS provides broad-spectrum killing power and 90-day residual control of structural pests on all surfaces.

Cy-Kick CS is a multi-use spray that is the flagship of Whitmire Micro-Gen's proprietary SmartCap microencapsulation technology platform and features cyfluthrin, a proven active ingredient that delivers the broadest insect control of the SmartCap family of products.

CY-KICK CS BENEFITS

- **Proven formulation** – Features Whitmire Micro-Gen's SmartCap™ Technology for proven performance on the toughest surfaces like concrete and mulch.
- **Real 90-day residual control** – Labeled for residential and commercial applications, including food handling.
- **Effective control of over 55 pests** – Offers you the broadest insect spectrum of the SmartCap family of products.

SMARTCAP MICROENCAPSULATION TECHNOLOGY BENEFITS

- **Extended residual control** – SmartCap Technology significantly enhances the residual life of products.
- **Enhanced performance on porous and highly absorbent surfaces** – Microencapsulation effectively stands up to concrete, mulch and other surfaces as the polymer shell protects the active ingredient making it readily available to pests.
- **Shortened contact time for pests** – Insects easily pick up the optimal sized SmartCap microcapsules, leading to the fast diffusion of the active ingredient into the exoskeleton of the pest.
- **Lower mammalian toxicity** – The microcapsule is designed to release the active ingredient into the exoskeleton of insects – while reducing its exposure to mammals.

CY-KICK® CS
Controlled Release Cyfluthrin

CY-KICK® CS CONTROLLED RELEASE CYFLUTHRIN

EFFECTIVELY CONTROLS OVER 55 PESTS INCLUDING
