

Hypertension in Pregnancy & the Postpartum Period Treatment Initiative Learning Session I

September 29, 2020

12:00 pm – 2:00 pm

Agenda

Session Objectives: Discuss the importance of timely identification and treatment of hypertension in pregnancy and the postpartum period. Review current case studies and statistics to increase awareness of treatment disparities for Black and Native American women. Identify ways to incorporate anti-racism into practice both personally and on an organizational level. Review available educational resources for professionals and patients/caregivers and incorporate into daily practice.
