netrixllc.com

Netrix specializes in the delivery of network infrastructure, data center, security, software development, systems services, unified communications, mobility, carrier and cloud services, hosted services, and managed services, as well as the hardware, software, and services needed to implement and support them. In short, we enable our clients to simplify their technology sourcing and speed deployment.

We design, implement, support and manage superior information technology solutions that help our clients run their organizations better.

Our client base includes Fortune 500 firms, financial institutions, government agencies, law firms, schools and universities, global organizations, healthcare providers, and professional SMBs.

Consistently ranked in the CRN VAR500 detailing the country's top system integrators, Netrix delivers "True Value" by solving business problems with technology solutions and guaranteed results. Customer satisfaction is our driving force. We aim for high touch and high service by forging intimate working relationships with our clients through engineering and account management.

Strategic Partnerships

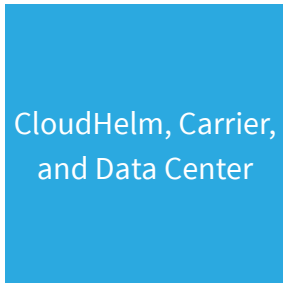

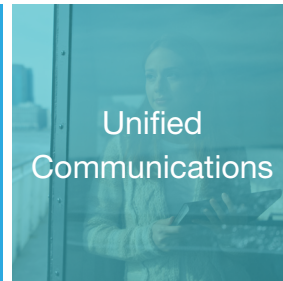

We work with the industry's best solution providers. Below is an example of some of the partnerships we leverage.

What separates Netrix from other partners?

We make it all work together.

Netrix works with clients to fully understand their business objectives and help build a technology roadmap. We can identify ways to help clients run their IT environment in the most efficient and effective ways possible and across all stacks of technology. Netrix teams are built with the brightest minds across different IT disciplines. Clients are comfortable knowing our engineering team has the experience and expertise to understand risks to the network and are confident knowing we can successfully design, deploy, and support these technologies.
