This is 1 on 1 Training Environment with Tracie Thomson

FINANCE AVAILABLE

Subject to approval

This program

is designed for Brow Enthusiasts to be trained in the latest Microblade Brow Feathering & Ombre application on the market. The 5 day course will cover Health and Safety through to Brow templating and application of Microblading. After completion of this course you will still need to practice as much as you can. We advise not to practice on people immediately but continue to build your technique by practicing on paper and latex skins. Once your technique is solid your confidence and skill will show when performing Microblading on your clients.

After this course we would like you to join our Private Facebook group. Here questions can be asked, students can discuss and problem solve with each other and admin. Your work can be uploaded and showcased. Product knowledge will continue through our student forum as ongoing support and education. So many situations and outcomes will arise through a career of Micropigmentation. It is impossible to filter this into any one course so the Group forum is a great place to come for resolution, experience and problem solving from each others work. We highly recommend joining.

Micropigmentation is not simple, it requires commitment, hard work and persistence. Be stubborn and determined to develop your new skill and people will come to trust your work. Micropigmentation procedures filter in Skin types, client situations and preferences, art, symmetry and preparation. Different situations will arise for every client, in this industry you will always be learning and can never know enough. A good start with fundamental knowledge to deliver this wonderful technique in a safe environment will give you an exciting edge and your clients the most up to date procedure straight out of Europe.

Artist Tracie Thomson

What is Micropigmentation:

Brow Feathering & Ombre Brow by manual tool is a form of Micropigmentation also known as Permanent Makeup, Cosmetic Tattoo and Semi Permanent Makeup & is a form of tattooing for cosmetic purposes. Pigment is deposited into the Dermal layer via skin penetration of needles, Splints or Blades. With Micropigmentation we can compliment and beautify our clients facial features thus simplifying and in some cases totally cutting out the time they spend daily applying makeup.

- ⇒ Client Consultation
- ⇒ Brow Templating
- ⇒ Perform Ombre Brow treatment on 2nd Model / continue sequence of Ombre Brow treatment on 3rd Model
- ⇒ Cleanup

Ombre Brow by Microblade is a powdering technique with light and shade covering the Brow template. It is extremely popular and fashionable. It will increase your revenue and amount of clientele you are able to treat as brow feathering is not suitable on every skin type. The microblade tool is a handle with a series of needles in a clustered group.

New & latest addition to Ombre is the blending of two colours which will be taught in this course structure.

Student Kit

It is essential to have good quality Blades and Pigments for Microblading. We use Ecuri Products from the Netherlands in students kits. These pigments are specifically formulated for manual tool application and the Ecuri blades are world class. Student Kits come with this workshop and given to each student, cannot be altered, refunded or exchanged. Students do not use any of their own kit contents during this work shop, all materials are supplied.
