

ALLOY HARDFACING

Evolving to meet YOUR Needs....

Independent Site Glass

- ◆ Independent Driven or
- ◆ Slave Driven
- ◆ Heavy Tubular Housing
- ◆ Stainless Auger
- ◆ Continuous Welded Auger

EFFECTIVE AND EFFICIENT:

The Alloy Site Glass constantly removes fine particles that might otherwise reduce the accuracy of the system for level indication.

EASY TO INSTALL AND OPERATE:

The Alloy Site Glass System is as easy to install as it is to operate and maintain.

The Site Glass is a direct replacement for the system of other OEM's.

CHOICE:

Alloy gives you the option of either Slave Driven or Independent Driven designs. Regardless, you get the same extra heavy tubular housing and stainless auger for years of trouble free operation.

LOW OPERATING EXPENSE:

The Alloy Site Glass is designed to provide years of trouble free operation due to selection of heavy duty components coupled with quality manufacturing. In addition to the auger being stainless steel, the flighting is continuous welded to heavy wall pipe.

◆ *Easy to Install*

◆ *Simple to Use*

◆ *Effective*

◆ *Low Maintenance*
