Polio Vaccine Simian Virus SV40

The CDC has admitted that between 1955–1963 over 98 million Americans received one or more doses of a polio shot which was contaminated with a cancer-causing virus called Simian vacuolating virus 40 (SV40). The CDC quickly took down the page, along with Google, but the site was luckily cached and saved to symbolize this grand admission.

What's going on with these people 🤔🤔
